

IN THE CLAIMS:

- 1 1. (Withdrawn) A method of payment for equipment usage, the method comprising:
2 establishing a minimum commitment for equipment usage per time period; and
3 exchanging payments for the equipment usage per time period based on an aggre-
4 gated usage whose value is at least as great as the greater of cumulative equipment usage
5 and cumulative minimum commitments.
- 1 2. (Withdrawn) The method of claim 1, wherein exchanging payments comprises:
2 multiplying said equipment usage by a price per unit of usage to obtain a usage pay-
3 ment;
4 determining a first difference between the cumulative minimum commitments and
5 the aggregated usage when the aggregated usage is less than the cumulative minimum com-
6 mitments;
7 adding to the usage payment an amount determined by multiplying said first differ-
8 ence by the price per unit of usage; and
9 updating the aggregated usage to include the first difference.
- 1 3. (Withdrawn) The method of claim 2, wherein establishing the minimum commitment
2 comprises:
3 identifying costs for the equipment; and
4 identifying the price per unit of usage based on the costs of the equipment.
- 1 4. (Withdrawn) The method of claim 3, wherein the costs are based on at least one of an
2 acquisition cost of the equipment, services to be provided, and supplies to be provided.
- 1 5. (Withdrawn) The method of claim 4, wherein the costs are further based on at least one
2 of an expected value of the equipment after a predetermined number of time periods, remar-
3 keting costs, a time value of money, profit margins, and risk of loss.

1 6. (Withdrawn) The method of claim 2, wherein exchanging payments comprises:

2 determining a second difference between the aggregated usage and a cumulative us-
3 age when the aggregated usage is at least equal to the cumulative minimum commitment and
4 the cumulative usage is less than the aggregated usage;

5 subtracting from the usage payment an amount determined by multiplying a lesser
6 one of the first difference and the second difference by the price per unit of usage; and

7 updating the aggregated usage by subtracting the lesser one.

1 7. (Withdrawn) The method of claim 1, further comprising:

2 identifying a number of time periods as a term for the usage of the equipment; and

3 identifying a total commitment for the term of usage as a sum of the minimum com-
4 mitments for the time periods of the term, wherein exchanging payments is limited by the
5 total commitment.

1 8. (Withdrawn) The method of claim 7, further comprising exchanging a payment to pur-
2 chase the equipment when a total of payments exceeds the total commitment multiplied by a
3 price per unit of usage.

1 9. (Withdrawn) The method of claim 7, further comprising:

2 determining a price per unit of usage based on continued usage of the equipment be-
3 yond the total commitment;

4 increasing the total commitment when the aggregated usage exceeds the total com-
5 mitment; and

6 exchanging payments for continued usage based on the continued usage multiplied
7 by the price per unit of usage.

1 10. (Withdrawn) The method of claim 1, further comprising setting the minimum commit-
2 ment for at least one time period at a start of the equipment usage to a lesser amount than the
3 minimum commitment for other time periods.

1 11. (Withdrawn) The method of claim 1, further comprising increasing the minimum
2 commitment to obtain upgrades for the equipment.

1 12. (Withdrawn) The method of claim 1, further comprising:
2 remarketing the equipment to obtain new equipment; and
3 changing the minimum commitment based on a difference between a market value
4 and a value realized by the remarketing.

1 13. (Withdrawn) The method of claim 12, wherein changing the minimum commitment
2 comprises exchanging a payment based on the difference.

1 14. (Withdrawn) The method of claim 1, wherein the equipment comprises multiple pieces
2 of equipment, the method further comprising combining usage for the multiple pieces of
3 equipment to obtain the equipment usage per time period.

1 15. (Withdrawn) A method of payment for equipment usage, the method comprising:
2 establishing a minimum commitment for equipment usage per time period based on
3 multiplying a minimum number of units of usage per time period by a price per unit of us-
4 age;
5 multiplying an aggregated usage by the price per unit of usage to obtain a first pay-
6 ment;
7 exchanging payments for the equipment usage per time period based on subtracting a
8 total of previous payments from a greater one of the first payment and cumulative minimum
9 commitments; and
10 updating the aggregated usage to reflect the cumulative minimum commitments
11 when the cumulative minimum commitments exceed the first payment.

1 16. (Withdrawn) The method of claim 15, wherein exchanging payments further com-
2 prises:

determining a first difference based on subtracting the cumulative minimum commitments from the first payment when the first payment is greater than the cumulative minimum commitments;

determining a second difference based on multiplying a result of subtracting cumulative usage from the aggregated usage by the price per unit of usage when the cumulative usage is less than the aggregated usage;

subtracting from the first payment an amount equal to multiplying a lesser one of the first difference and the second difference by the price per unit of usage; and

updating the aggregated usage by subtracting the lesser one from the aggregated usage.

17. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 52 wherein:

A) the quantity p_i is the payment for equipment usage during the i th time period; and

B) the instructions direct the computer system to calculate the quantity p_i by employing operations that include:

i) multiplying by a price per unit of usage a pre-update aggregate usage $A_{i-1} + u_i$ and subtracting a total of previous payments, wherein cumulative

payments $\sum_{j=1}^i p_j$ are at least equal to an amount determined by

multiplying the cumulative commitment by the price per unit of usage; and

ii) updating the pre-update aggregated usage to obtain a value for the updated aggregated usage A_i that reflects the cumulative payments when the cumulative commitment exceeds the pre-update aggregated usage.

18. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 17 wherein the instructions direct the computer system to:

3 subtract a credit from the payments for the equipment usage for a time period when
4 the pre-update aggregated usage is greater than the cumulative commitment and greater than
5 cumulative actual usage through the time period; and

6 update the pre-update aggregated usage to obtain a value for the updated aggregate
7 usage that reflects the credit.

1 19. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 18, wherein the instructions to subtract the credit further comprise
3 instructions to:

4 determine a first difference between the pre-update aggregate usage and the cumula-
5 tive actual usage;

6 determine a second difference between the pre-update aggregate usage and the cu-
7 mulative commitment; and

8 determine the credit by multiplying the price per unit of usage by a lesser one of the
9 first difference and the second difference.

1 20. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17, wherein the instructions to establish a price per unit of usage fur-
3 ther comprise instructions to establish the costs based on at least one of an acquisition cost
4 of the equipment, services to be provided, and supplies to be provided.

1 21. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in 20, wherein the instructions to establish a price per unit of usage further
3 comprise instructions to establish the costs based on at least one of an expected value of the
4 equipment after a predetermined number of time periods, expected remarketing costs, a time
5 value of money, profit margins, and risk of loss.

1 22. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17, further containing instructions to:

3 identify a number *N* of time periods as a term for the usage of the equipment;

4 identify a total commitment for the term of usage as the cumulative commitment C_N
5 for the time periods of the term; and
6 limit the payments obtained to the total commitment multiplied by the price per unit
7 of usage.

1 23. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 22, further containing instructions to obtain a payment to purchase the
3 equipment when a total of payments exceeds the total commitment multiplied by the price
4 per unit of usage.

1 24. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 22, further comprising instructions to:
3 determine a price per unit of usage based on continued usage of the equipment be-
4 yond the total commitment; and
5 obtain payments for continued usage based on the continued usage multiplied by the
6 price per unit of usage.

1 25. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17 wherein:

3 A) $C_i = \sum_{j=1}^i c_j$, where c_j is an incremental commitment for the j th time period;

4 and

5 B) the computer-readable medium contains instructions to set the incremental
6 commitment for at least one time period at a start of the equipment usage to a
7 lesser amount than the incremental commitments for other time periods.

1 26. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17, further containing instructions to:

3 increase the minimum number of units of usage; and

4 obtain upgrades for the equipment based on the increase.

1 27. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17, further comprising instructions to:

3 remarket the equipment to obtain new equipment; and
4 adjust the payments based on a difference between a market value and a value real-
5 ized by the remarket.

1 28. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 17, wherein the equipment comprises multiple pieces of equipment
3 and wherein the instructions to obtain the value of actual usage direct the computer system
4 to combine usage for the multiple pieces of equipment.

1 29. (Withdrawn) A method of leasing equipment, comprising:
2 establishing a price per unit of equipment usage;
3 establishing a minimum number of units of equipment usage per time period; and
4 exchanging payments per time period based on multiplying a credited number of
5 units of usage by the price per unit of equipment usage and subtracting a total of previous
6 payments, wherein cumulative payments for a number of time periods are at least equal to
7 an amount determined by multiplying a total of the minimum number of units of equipment
8 usage over the number of time periods by the price per unit of equipment usage; and
9 updating the credited usage to reflect the cumulative payments when the total of the
10 minimum number of units of equipment usage over the number of time periods exceeds the
11 credited usage.

1 30. (Withdrawn) A method of leasing equipment for a specified number of time periods,
2 comprising:
3 providing the equipment for use;
4 identifying a value of the equipment;
5 identifying a price per unit of usage based on the value of the equipment;

6 establishing a cumulative minimum number of units of usage per each of the time
7 periods;

8 tracking usage of the equipment for each time period and adding the usage to previ-
9 ous usage to obtain total usage;

10 obtaining payments for usage of the equipment per time period based on multiplying
11 a greater one of the total usage and the cumulative minimum number by the price per unit of
12 usage and subtracting a total of previous payments; and

13 updating the total usage to reflect the cumulative minimum number when the cumu-
14 lative minimum number is greater than the total usage.

1 31. (Withdrawn) A method of depreciating equipment, comprising:

2 establishing a minimum commitment for usage of the equipment per time period;

3 establishing a price per unit of usage;

4 determining a greater one of cumulative usage and cumulative minimum commit-
5 ment for a time period;

6 multiplying the greater one by the price per unit of usage and subtracting a total of
7 previous depreciation to obtain a depreciation expense for the time period;

8 incurring the depreciation expense; and

9 updating the cumulative usage to reflect the cumulative minimum commitment when
10 the cumulative minimum commitment is greater than the cumulative usage.

1 32. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium
2 defined in claim 52 wherein the quantity p_i is the payment for equipment usage during the
3 i th time period, and the instructions direct the computer system to:

4 establish a price per unit of usage;

5 determine a greater one of a pre-update aggregated usage $A_{i-1} + u_i$ and the cumulative
6 commitment C_i ;

7 multiply the greater one by the price per unit of usage and subtract a total of previous
8 depreciation to obtain a depreciation expense for the time period; and

9 update the pre-update aggregated usage to obtain an updated aggregated usage that
10 reflects the cumulative minimum commitment when the cumulative minimum commitment
11 is greater than the pre-update aggregated usage.

1 33. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 32, wherein the instructions to establish a price per unit of usage
3 comprise instructions to adjust the price per unit of usage when a predetermined threshold
4 amount of usage is exceeded.

1 34. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 32, wherein the instructions to establish a price per unit of usage
3 comprise instructions to:
4 identify costs of the equipment; and
5 determine the price per unit of usage based on the costs of the equipment.

1 35. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 34, wherein the instructions to identify costs of the equipment com-
3 prise instructions to determine the costs based on at least one of an acquisition cost of the
4 equipment, services to be provided, and supplies to be provided.

1 36. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in 35, wherein the instructions to identify costs of the equipment further com-
3 prise instructions to determine costs based on at least one of an expected value of the
4 equipment after a predetermined number of time periods, remarketing costs, a time value of
5 money, profit margins, and risk of loss.

1 37. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 32, wherein the instructions direct the computer system to:
3 identify a number of time periods N as a term for the usage of the equipment; and

limit the depreciation expense to a total commitment equal to the cumulative commitment C_N for the time periods of the term multiplied by the price per unit of usage.

38. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 37, wherein the instructions direct that the equipment be purchased when the updated aggregated usage exceeds C_N .

39. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 37, further comprising instructions to:
determine a price per unit of usage based on continued usage of the equipment beyond the total commitment ; and
incur additional depreciation expense for the continued usage based on the continued usage multiplied by the price per unit of usage.

40. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 32 wherein:

A) $C_i = \sum_{j=1}^i c_j$, where c_j is an incremental commitment for the j th time period;

and

B) the computer-readable medium contains instructions to set the incremental commitment for at least one time period at a start of the equipment usage to a lesser amount than the incremental commitment for other time periods.

41. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 32, further comprising instructions to:

increase the cumulative commitments C_i ; and

obtain upgrades for the equipment based on the increase.

42. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable medium defined in claim 32 wherein the instructions direct the computer system to:

3 remarket the equipment to obtain new equipment; and
4 adjust the depreciation expense based on a difference between a market value and a
5 value realized by the remarket.

1 43. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
2 dium defined in claim 32, wherein the instructions to incur the depreciation expense further
3 comprise instructions to:

4 subtract a credit from the depreciation expense for a time period when the pre-update
5 aggregated usage is greater than the cumulative commitment through the time period, and
6 greater than cumulative usage through the time period; and
7 update the pre-update aggregated usage obtain an updated aggregated usage that to
8 reflects the credit.

44. (Currently Amended) ~~A computer-readable medium as~~ The computer-readable me-
dium defined in claim 32, wherein the equipment comprises multiple pieces of equipment,
the instructions further directing the computer system to:

 track usage per time period for each one of the multiple pieces of equipment; and
 combine the usages per time period for the multiple pieces of equipment to obtain
the actual usage.

1 45. (Currently Amended) ~~For~~ A method for specifying at least one of payments for and de-
2 preciation of equipment, a method comprising:

- 3 A) obtaining cumulative commitments C_j to usage of the equipment for succes-
4 sive time periods $j = 1, 2, \dots$; and
5 B) employing a computer system to, for each given, i th time period of a plurality
6 of the time periods:
7 i) obtain the value u_j of actual usage of the equipment;
8 ii) calculate therefrom a quantity p_i based on a usage value equal to the
9 difference $A_i - A_{i-1}$ between an updated aggregated usage A_i for the
10 given time period and an updated aggregated usage A_{i-1} for the previ-

ous time period, where the updated aggregated value A_k for any, k th time period is at least as great as the greater of the k th time period's cumulative commitment C_k and the k th period's cumulative actual usage $U_k = \sum_{j=1}^k u_j$; and

- iii) provide an output that specifies the quantity thus calculated as at least one of the payment and the depreciation for the given time period.

46. (Currently amended) ~~A method as~~ The method defined in claim 45 wherein A_k is the greater of:

- A) the k th time period's cumulative commitment C_k and
- B) the sum of the k th time period's actual usage u_k and the previous time period's updated aggregated usage A_{k-1} .

47. (Currently amended) ~~A method as~~ The method defined in claim 46 wherein the quantity p_i calculated for the given, i th time period equals the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per unit of usage and the difference $A_i - A_{i-1}$ between the updated aggregated usages of the given and previous time periods.

48. (Currently amended) ~~A method as~~ The method defined in claim 47 further including at least one of incurring depreciation expense in the amount of p_i and making or receiving a payment in the amount of p_i .

49. (Currently amended) ~~A method as~~ The method defined in claim 45 wherein A_i is the greater of the i th time period's cumulative commitment C_i and the i th time period's cumulative actual usage $U_i = \sum_{j=1}^i u_j$.

1 | 50. (Currently amended) ~~A method as~~ The method defined in claim 49 wherein the quantity
2 | p_i calculated for the given, i th time period equals the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per
3 | unit of usage and the difference $A_i - A_{i-1}$ between the updated aggregated usages of the given
4 | and previous time periods.

1 | 51. (Currently amended) ~~A method as~~ The method defined in claim 50 further including at
2 | least one of incurring depreciation expense in the amount of p_i and making or receiving a
3 | payment in the amount of p_i .

1 | 52. (Currently amended) A computer-readable medium ~~For~~for enabling a computer system
2 | to specify at least one of payments for and depreciation of equipment for which cumulative
3 | commitments C_j of usage of the equipment have been made for successive time periods $j =$
4 | $1, 2, \dots$, ~~a~~the computer-readable medium containing instructions readable by the computer
5 | system to configure the computer system to, for each given, i th time period of a plurality of
6 | the time periods:

7 | A) obtain values u_j of actual usage by the user;

8 | B) calculate therefrom a quantity p_i based on a usage value equal to the differ-
9 | ence $A_i - A_{i-1}$ between an updated aggregated usage A_i for the given time pe-
10 | riod and an updated aggregated usage A_{i-1} for the previous time period, where
11 | the updated aggregated value A_k for any, k th time period is at least as great as
12 | the greater of the k th time period's cumulative commitment C_k and the k th

13 | period's cumulative actual usage $U_k = \sum_{j=1}^k u_j$; and

14 | C) provide an output that specifies the quantity thus calculated as at least one of
15 | the payment and the depreciation for the given time period.

1 | 53. (Currently amended) ~~A computer-readable medium as~~ The computer-readable medium
2 | defined in claim 52 wherein A_k is the greater of:

3 | A) the k th time period's cumulative commitment C_k and

- 4 B) the sum of the k th time period's actual usage u_k and the previous time pe-
5 riod's updated aggregated usage A_{k-1} .

1 54. (Currently amended) ~~A computer-readable medium as~~ The computer-readable medium
2 defined in claim 53 wherein the quantity p_i calculated for the given, i th time period equals
3 the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per unit of usage and the difference $A_i - A_{i-1}$ between
4 the updated aggregated usages of the given and previous time periods.

1 55. (Currently amended) ~~A computer-readable medium as~~ The computer-readable medium
2 defined in claim 52 wherein A_i is the greater of the i th time period's cumulative minimum
3 commitment C_i and the i th time period's cumulative actual usage $U_i = \sum_{j=1}^i u_j$.

1 56. (Currently amended) ~~A computer-readable medium as~~ The computer-readable medium
2 defined in claim 55 wherein the quantity p_i calculated for the given, i th time period equals
3 the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per unit of usage and the difference $A_i - A_{i-1}$ between
4 the updated aggregated usages of the given and previous time periods.

1 57. (Currently amended) A computer system ~~For~~ for specifying at least one of payments for
2 and depreciation of equipment for which cumulative commitments C_j of usage of the
3 equipment have been made for successive time periods $j = 1, 2, \dots$, ~~a~~ the computer system
4 being configured to, for each given, i th time period of a plurality of the time periods:

- 5 A) obtain values u_j of actual usage by the user;
6 B) calculate therefrom a quantity p_i based on a usage value equal to the differ-
7 ence $A_i - A_{i-1}$ between an updated aggregated usage A_i for the given time pe-
8 riod and an updated aggregated usage A_{i-1} for the previous time period, where
9 the updated aggregated value A_k for any, k th time period is at least as great as

the greater of the k th time period's cumulative commitment C_k and the k th

period's cumulative actual usage $U_k = \sum_{j=1}^k u_j$; and

- C) provide an output that specifies the quantity thus calculated as at least one of the payment and the depreciation for the given time period.

58. (Currently amended) ~~A computer system as~~ The computer system defined in claim 57 wherein:

A_k is the greater of:

- A) the k th time period's cumulative commitment C_k and
B) the sum of the k th time period's actual usage u_k and the previous time period's updated aggregated usage A_{k-1} .

59. (Currently amended) ~~A computer system as~~ The computer system defined in claim 58 wherein the quantity p_i calculated for the given, i th time period equals the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per unit of usage and the difference $A_i - A_{i-1}$ between the updated aggregated usages of the given and previous time periods.

60. (Currently amended) ~~A computer system as~~ The computer system defined in claim 57 wherein A_i is the greater of the i th time period's cumulative minimum commitment C_i and

the i th time period's cumulative actual usage $U_i = \sum_{j=1}^i u_j$.

61. (Currently amended) ~~A computer system as~~ The computer system defined in claim 60 wherein the quantity p_i calculated for the given, i th time period equals the product $r_i \cdot (A_i - A_{i-1})$ of a price r_i per unit of usage and the difference $A_i - A_{i-1}$ between the updated aggregated usages of the given and previous time periods.
